DETAILED ACTION

Election/Restrictions

1. Claim 5 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10 August 2006.
2. Applicant's election of Group I, claims 1-4 in the reply filed on 10 August 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 1-5, the preamble is unclear as to whether the **“apparatus for removing particles”** or the **“processing device”** includes the vacuum container unit having a plurality of chambers....Accordingly, it is unclear whether the “conveyor unit” (line 9) and “vacuum container unit” (line 12) are being positively claimed. See also claim 3, line 3, which recites “the vacuum container unit.”

Also, the precise scope of claim 1 cannot be clearly determined since line 5 recites “the apparatus comprising” and it is unclear whether the recitations on lines 2-5 are being **positively** recited.

Claim 1, lines 8-9, “a waiting-accommodation unit” should be positively recited.

Conclusion

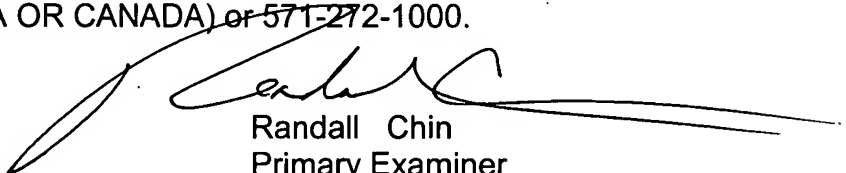

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Andros and Lur are relevant to various particle removing systems.
